

# Convenient blood work options

With the Otsuka Laboratory Support Program, you can get your Risk Evaluation and Mitigation Strategy (REMS) required **blood work done for free**, if your insurance does not cover it.

## Free lab work at LabCorp or Quest Diagnostics

Before you go to the lab, remember to

- Obtain an Otsuka Laboratory Support Program Requisition Form from your doctor. Make sure the requisition form has the Otsuka logo on it, to avoid billing issues
- Bring the requisition form with you to any Quest Diagnostics or LabCorp location to get your REMS-required blood work done for free
- Only REMS-required lab work (ALT/AST/bilirubin/ALP) is covered

## Free home collection of blood sample

Make an appointment for a phlebotomist to come to your home to collect a blood sample for your REMS-required blood work.

**You must schedule your appointment 2-4 weeks in advance**, to allow us to find a phlebotomist in your area.

ALP=alkaline phosphatase; ALT=alanine aminotransferase; AST=aspartate aminotransferase.
